

RESIDUE WAX

Residue wax (also known as Foots Oil) is the oil extracted from Slack wax in the process of producing Paraffin wax. Residue wax contains high percentage of oil and, in view of the oil content, can be found as liquid or semi-solid in the room temperature. Oily nature of residue wax makes this product appropriate as a lubricant in several industries. Residue wax is a by-product acquired by slack wax de-oiling or sweating in the paraffin wax manufacturing process. Greasy nature

of Residue Wax furthermore cheap price, have made such material a suitable surrogate in industrial applications such as textile, leather, rubber industries, match sticks, polish and

Residue Wax Specifications vary from each producer to other, but there are general aspects to understand the quality of the product demonstrated in the below table:

Properties	Test method	Light	Medium	Heavy
Oil Content (Weight %)	ASTM, D-721	25-40	20-50	25-50
Congealing Point (°C)	ASTM, D-938	40	25	25
Viscosity & 100°C(cSt)	ASTM, D-445	3.6 - 4.6	4.7 6.9	7 – 11.5

Available Packaging	
Package Type	Quantity per 20 FCL
New Steel Drum	80 Drums/20 FCL

Zista Group supplies different grades of Residue Wax worldwide while guarantying the aspects of quality for each shipment. The steady supply of Residue Wax by Zista Group is direct from Sepehan, Pars Oil and other certified refineries from Iran.
